

Top Four

Reasons Why You Need The CopperLink PoE Ethernet Extender

1

Extend to 3,300 feet and Deliver 15 watts of Electrical Power

Standard Ethernet offers a limited 300 feet (100 meter) distance; CL1101 extends up to 3,300 feet.

2

Operate over a Single Twisted Pair (2 wires)

Whereas standard PoE specifies a 4-wire requirement, the CL1101 can operate over a single twisted pair.

3

Fast Installation with Plug-and-play setup and operation

The CL1101 features fast and convenient installation with plug-and-play set-up and operation.

4

Avoid high costs of Contracting and Licensing a High-voltage Cabling project

The CL1101 eliminates the need of installing network cabling, electrical service wiring, or power outlets
